1 Equations

This is a demonstration of some of the latex commands that you need for the assignment.

$$f(x) = x_n^{2\frac{1}{2}} \sin x \cos x \log x \tag{1}$$

To write the math expression in-line (i.e. in the text), you have to put a \$ at each side of the symbol. So if we want to represent the function $f(x)$ in-line, we should write it with \$ on either side: $f(x)$
